- jQuery
- C
- C#

As a web developer with a passion for design and interaction, my objective is to build innovative web applications with other developers that meet the needs of end-users. With strong skills in web development, database management, responsive design, and extensive experience in ReactJS, I am confident in my ability to deliver web solutions that are both functional and engaging. I strive to stay current with the latest trends and technologies in the industry to create cutting-edge web experiences.
